

BAB 5

KESIMPULAN DAN SARAN

5.1 Kesimpulan

1. Penggunaan natrium valproat tidak mempengaruhi kadar magnesium dalam serum pada pasien epilepsi.
2. Pasien epilepsi yang mendapat terapi natrium valproat memiliki resiko terjadinya kejang yang lebih kecil dibandingkan dengan tidak menggunakan obat natrium valproat.
3. *DRPs* yang dialami oleh 2 pasien yang menggunakan natrium valproat adalah mual dan pusing.

5.2 Saran

Untuk penelitian dengan menggunakan metode prospektif, perlu dilakukan penelitian lebih lanjut dengan jumlah sampel yang lebih banyak agar hasil yang diperoleh lebih valid dan representatif.
