E. Filling in the omitted words
Every year students in many countries learn English. Some of these students are young children. Others are teenagers. Many are adults. Some learn at school, others study by themselves. A few learn English just by hearing the language, in films, on television, in the office, or among their friends. But not many are lucky enough to do that. Most people must work hard to learn another language. Learning another language! Learning English! Why do all these people want to learn English? It is difficult to answer that question. Many boys and girls learn English at school because it is one of their subjects. They study their own language, and mathematics, and English.

III. TEACHING-LEARNING ACTIVITIES

PART A : The teacher asks the students to listen
twice to the recorded material on the tape; the students listen only.

PART B: The teacher asks the students to listen to ten minimal pairs recorded, and later they should circle the letter 'S' in their handout if the sounds they hear are the same, or 'D' if the sounds are different. The students listen carefully to each item which is read twice, and then circle 'S' or 'D'.

PART C: The teacher asks the students to listen carefully as the recorded passage is being played once. Then the teacher explains the meaning of any words or expressions that may not be clear to the class. Afterwards the students can listen again to the passage, with pause after each sentence. Then they can answer the comprehension questions printed in their handouts. The teacher may check the answers directly after the end of PART C, or before the end of the lesson.

PART D: The teacher asks the students to listen to five words stated / recorded, twice or three times, and then the students may put a cross on one of the options (A, B, C, or
D) that best shows the meaning of the word they hear.

PART E: A recorded passage is read completely. First, it is read in normal speed. Second, there is a pause after each sentence. Third, the passage is read in normal speed again. While listening to the passage, starting from the second playback, the students should write down the omitted words / phrases to complete the passage.

PART F: The text (consisting of ten items) is played three times, as what has been done in PART E, and the students should write down the sentences they hear.

IV. TIME ALLOCATION: 60 MINUTES.

Anne: Yes, three air letter sheets, please. What do they cost?
Assistant: Twenty cents.
Anne: Each?
Assistant: That's right. Twenty cents each.
Anne: So how much is that altogether?
Assistant: Eighty-five cents altogether.
Anne: Thank you.

E. Dialogue Exploitation

Peter: Let's buy Antonio a book for his birthday.
Maria: Good idea. How about a _biography_?
Peter: Well, I think he only likes _police stories_.
Maria: Umm, how about _magazines_ instead?
Peter: No, he usually reads them at the library.
Maria: I know he likes _sports_.
Peter: Then how about a _book on baseball_?
Maria: I can't decide.
Peter: *Let's just give him a card.*

Maria: OK, I agree with you.

II. STUDENT'S HAND-OUT

A. **PART A AND PART B ARE THE SAME AS THE TEACHER'S.**

C. **Adaptation:**

The same as the teacher's, but the answers (printed in italics) are omitted, except the answers to number 1 (for 1.a and 1.b) since they are used as the examples.

D. **Conversation:**

Exactly the same as the teacher's, but Jerry's part in 1.1 and Assistant's part in 1.2 are omitted, so as to give the students opportunity to take part in those conversations.

E. **Dialogue Exploitation:**

The same as the teacher's.

III. TEACHING-LEARNING ACTIVITIES

A. **PART A:** The teacher explains to the students how to articulate sound [{\textendash}]) using the provided facial diagram. He should tell them to put the tip of their tongue between their teeth and then pronounce [{\textendash}]). After that he can
ask his students to repeat after the recorded words in the list, and later the sentences.

PART B: First, the teacher should lead his students to understand the meaning of the words and phrases in the conversation. Afterwards the students are asked to repeat each sentence uttered by the native speakers using normal speed, and pronounce them as naturally as possible with good intonation, stress, and rhythm. While repeating, the students record their voices on tape. The provided intonation lines guide the students to use the expected intonation. After that, they can compare their utterances with the native speakers by playing the cassette back. Finally, the teacher may ask the students to memorize the conversation, as a step to enter PART C.

PART C: Having memorized the conversation, the students are ready to adapt parts of it to other situations, forming short dialogues. Each short conversation consists of a question followed by an answer or two related statements. So the students must read the cassette, through which the students can check their own and compare their utterances with those of the native speakers. If their answers are still incorrect, they can rewind their tape and re-record their correct answers without being afraid of losing the native speaker's voice, because the recorded native speaker's voice cannot be erased by the students' tape recorder.

PART D: First, the teacher asks the students to listen carefully to the conversations, twice. Then he should ask them to repeat the utterances spoken by the speakers in those conversations. Finally, the students are given a chance to speak as one of the speakers, in this case they should speak as Jerry (in 1.1) and as the assistant (in 1.2).

PART E: The teacher asks several pairs of students to read the dialogue, so as to give clear description on pronunciation, including the
intonation, stress, and rhythm. Then he asks the students to memorize the dialogue. Afterwards, he can ask several pairs of students to come in front of the class and dramatize the dialogue. Finally, he asks them to modify the dialogue, little by little, starting from the underlined words. This activity is preferably done in a classroom.
