Head of English Department
ACKNOWLEDGEMENTS

This thesis is written as a partial fulfillment of the requirements for the “Sarjana Pendidikan” Degree in Teacher Training and Education Faculty at English Department of Widya Mandala Catholic University, Surabaya.

Foremost, the writer would like to give all the glory and her greatest thanks only to Lord Jesus Christ who has blessed her in finishing her thesis.

The great thanks and gratitude are also given to people who have supported and guided her during the process of making her thesis. Those people are:

1. Dr. Tjahjaning Tingastuti Surjususeno, M.Pd, the writer’s advisor, who has given her time during her busy days in helping and patiently guiding the writer by giving some suggestions and ideas in finishing her thesis.

2. Michael Daranto S.T, MMT, the school principal of SDK ST THERESIA 1 Surabaya, who has welcomed the writer warmly and given the permission to collect some data needed for completing her thesis.

3. The beloved students of the first grade of Elementary School in SDK ST THERESIA 1 academic year of 2008/2009 for being cooperative

4. All the lecturers in English Department of Widya Mandala Catholic University who have willingly shared some precious ideas for the writer to complete her thesis

5. The writer’s father, mother, brother and the big family who have given the writer a lot of supports, love and prayers in finishing her thesis.

6. All the writer’s best friends, Fani Christanto, Maria Greciana, Dewi Kurniasih, Dennis Chistian, Andy Sanjaya, Eveline Agustin, Robby Yuwana for their helps, supports and attention so that the writer could complete her thesis.
7. Ronald Yohanes Saruso, S.Pd, the writer’s boyfriend, who has patiently given his help, support, love, prayer and attention in finishing her thesis.

8. Mr. Setiawan Pahlevi and Mr. Anthony Wijaya who have helped and guided the writer in statistical matters.

9. The librarians who have lent the writer some books which have given valuable information for her thesis completion.

The writer realized that without the helpful cooperation of those mentioned above, the writer could not finish her thesis. Finally, the writer would like to give her gratitude and appreciation to those who have not been mentioned for their loves, supports, attentions and prayers to the writer. Thank you very much and God Bless You.

ABSTRACT

Advisor : Dr. Tjahjaning Tingastuti Surjususeno, M.Pd.

Keywords : Vocabulary, Coloured Pictures, Word Translation and Teaching Techniques.

English language has been internationally used. There are four language skills that need to be developed: listening, speaking, reading, and writing. In order to be able to do so, learners must know and understand the language components, namely vocabulary, grammar and pronunciation (Rubin, 1994:7). One of the most important components of the language that needs to be mastered is vocabulary. People will have some difficulties in learning English if they have not known about the words. This is the reason why, vocabulary needs to be introduced as soon as possible to young learners.

Teachers in the classroom usually teach the vocabulary in a traditional way using word translation. Teaching using word translation might cause a burden to the students and it is considered ineffective (Scrivener, 1994:73). For this reason, the writer would like to introduce an interesting way of teaching vocabulary to the students using coloured pictures. The writer would like to know which technique is more effective in teaching vocabulary to the first graders of Elementary School.

In this experiment, the writer took the first graders of Elementary School in SDK ST THERESIA 1 Surabaya as the subjects of the study. The writer took two classes as the sample of the experiment which are called the experimental group and the control group. The experimental group is taught using coloured pictures and the control group is taught using the vocabulary word translation technique.

In the statistical calculation of the post-test between the experimental group and the control group, it was found out that the $\tau$-obtained was 5.2972 and the $\tau$-table at 5% level of significance was 1.671. It showed that the $\tau$-observation > $\tau$-table. Since the $\tau$-observation is greater than the $\tau$-table, so Ha is accepted which meant that there was a significant difference between the experimental group and control group. The experimental group who was taught using coloured pictures got higher vocabulary achievement than the control group who was taught using vocabulary word translation technique.
