APPENDICES

Appendix 1

- The fee of T10 in Singapore may appear in very high amount.
- Not all the students of English Department are able to pay fees.
- Rent is not affordable, price to visit, moreover the travel price to go to Bali, any quarter from
  the travel price to Singapore.
- The main purpose of T10 is to make habits of speaking English, therefore it doesn't need to be afraid
  to speak English.

Counter Reason:
- The fee of T10 can be involved during the early semester.
- Most students in English department are mid-high socio-economic class.
- But is still located in Indonesia, where local people are forced to speak Indonesian.
- The purpose of T10 also have fun before graduation, it will be more society if we visit
  abroad and responsible to speak English anywhere, even with local people.

Between Singapore and Bali, the pro and the con due to the 2008 T10 program.

Total Innovation Days / T10 have become the most qualified annual activity for students of

English department in every semester. T10 program are used for held in the 7th semester, where most of
the students almost finish their study. The T10 program has become the most awaited because it is
fun and secure, every participants are responsible to speak English all the time while having holiday
when the new academic year. The main destination of T10 program is Bali, surrounded by lot of
supporter factors such as the travel price, the entertainment, the place to visit, and also the foreigner.

that may exist in Bali, this kind of event always become the main destination of T10 program.
Due to the popular issue, the TIM 2008 will be little bit different with the previous TIM.

The refresher of the 2008 academic year are purpose to host TIM in abroad, in Singapore. This phenomenal give the big new controversy between student, lecture and also the parents of the students since some of them are agree and some other are not agree with the idea of TIM abroad. Response to this phenomenon, I write personally. I don't agree that is the idea of helping TIM program abroad. There are several reason that strengthen my opinion in the term of not agree with the idea.

First of all, my major consideration is about the travel price of TIM program. It has been experiences, while I held the responsibility of being the Secretary member of TIM program for my academic year, the travel price of TIM to Paris is around Rp. 600,000 - Rp. 800,000 for each student. I thought that it was a high travel price for some of the students, in fact there were some students who were not participate in this program because of financial matter. Moreover, the travel price to go abroad are certainly higher than the travel price to Paris. It's true that students are required to paid the travel price during the study semester, but I'm sure that the installment amount will be increasing many times since.

The purpose of study abroad is to increase the other interrelated matters within. By the high cost of travel price, it will open opportunity for some students not to participate the program because of financial matter. However, the quality of the student is the main model to make success the program. The fact provide that most of students in English department are came from middle high - socio economy class. If the cost not then they would be accept in which Morina. Apart, even half of the students are came from in middle - socio economy class, so all of those parents are willing to pay m
74

Just having fun abroad. Over here they eat money to pay for the study, so we want to press them
with extra cost just to have fun abroad, whereas in another cheaper alternative offered?

Well, as I experienced, it is very interesting place to visit, beach, live cover visit everywhere. I also
find it interesting that Singapore is more interesting than Bali. The problem is local people in Bali are open to

Unlike local people in Singapore are open, stylish and maintain a friendly image. This matter can be the easy.

Just think up to speak Indonesia with shopkeeper or local people only. It doesn't really an important
matter to speak Indonesian with shopkeeper or local people as long as how balance it by telling English
with forever and frequence there. There is lot of interesting place to visit, where I believe Singapore also

Provide many place to visit, however have to my, more conversation about travel time, more place to visit
in Singapore, the longer the one may appear to amount.

Most of all, reflect on the main purpose of the program, as I conclude that the purpose of the
main purpose of the program is to have a habit of speaking English wherever it is. The purpose of having fun and holiday is the additional
purpose of the trip. Therefore, if the main purpose is to have fun and travelling together before the competition.

It will be better if the committee design another activity that purpose to have fun and travelling before or
after the competition and it should be done in the competition. For every student in the academic year. The competition
are free to choose where they want to go travel. It could be to Indonesia, to Australia, to Malaysia or any
other interesting place, and for those who were not able to follow the activity are free to not participate.

Finally, it is better to visit Bali on the destination of the program, besides the cheaper
traveling price, there are also hundreds of excitement hotel. We can enjoy of dinner together beside the
beach at Jimbaran, play the watersports at Bali, see the beauty of Tanah Lot, and other
pacer to have fun. The most important is the unity of learners for the last time, before the

personalise, before everyone has their own career and before we consider as a of teacher, to evaluate.

It's really time to have this program, even in Bali at all.

"Should we, English Department Students, speak English all the time on our campus?"

"I think the English Native Speaker is one of the solutions to help the students to improve their speaking ability."

"English native speakers at the English Department. This expert brings many good records and gives the students to speak English all the time on our campus."

"This way has a purpose to increase the quality of speaking ability in Indonesia."

"I believe, English will be very poor and have low value quality. That's why, it is really needed to do a breakthrough to rectify that condition.

"My first reason is that the English Department has more English native speakers, they can encourage the students in communicating with all of the people around the campus all the time."

"At that time, I followed it because my friends asked me. They said..."
that there were two native speakers who would speak the SLE on that day. Actually, I myself was very eager of communicating with the native speakers. I didn't have self-confidence to speak with them because I knew that my English was not very good. Besides that, I am not used to use English in communicating with my friends and my lecturers. During that SLE, I just kept my mouth tightly. But then, I was very surprised that one of the native speakers called my name and asked me to answer his questions as the representative of my friends. I could not imagine how nervous I was at that time. But, finally, I answered the questions because all my friends were looking at me and hoping that I could be a good representative of them. Never came in my mind before that I could have a better talk than I did. Now, I'm sure that there are more English native speakers in the English Department which will make the students become more active in using their English everyday. After that, I built my confidence to speak English all the time on campus because I realized that being an English department student, I should have a good speaking quality and it will help me to fulfill the urgently requirement when I seek the occupation.

My second reason is that in the English Department has more English native speakers, the lecturers can exchange the knowledge together with native speakers. It is a way to improve the English curriculum especially in the English Department of Handan University. Besides that, the teaching method in English Department will be accordance with the international standardization. For example, the Seattle University of America has different method in teaching especially in the learning process. The study...
There must be more active than the textbooks and the sources. Do not depend only on the textbooks but more than that, the students should get more data or information from the history, internet, and also from their peers. Besides that, the students have to join in many extra curricular after their study schedules are over. This method forces the students to become more independent. They can solve their difficulties by themselves. From the example above, we can see that our curriculum is quite different with the curriculum in other countries. That's why, by adding more English classes, the students hopefully will bring good results in order to improve the curriculum so that it will fulfill the international standardization.

My third reason is that in the English Department has more English native speakers, it will increase the quality of the faculty. All the students will have more English native speakers who will try to improve the English level study. Especially, the English Department that it can give the best teaching method to their children. Most of parents realized that teaching English or the native's English become very important to communicate with the foreigner. If their children can speak English, they will have many advantages in the future, and so that it will increase their incomes. As the result, many parents enroll their children to study in the department. In fact, in the new academic year 2009, the number of new students in the English Department have increased from 110 to 145 students. It is because the English Department had already success in improving their methods or teaching.

In short, English Department should have more English native speakers in order to increase the quality of English education, especially in Unda Mandala Catholic University. This was the best time to do this, just as the country included the students and the lecturers need the second for the country, Indonesia. As we know that Indonesia is one of the developing countries, so to achieve that purpose, Indonesia people should improve their English skill in order to make Indonesia Human Resources become better than before. Hopefully, by having a better quality of Indonesia, human resources will increase the economies and foreign exchanges of this country.

You didn't respond to the prompt properly. You were asked to argue whether the students should always speak English on the campus all the time. You have to make the students speak on the campus. That's a different issue.

Bali or Singapore: Which One To Choose?

There is a lot of arguments between the English Department students on whether we should have our next TID in Singapore. TID or Total Immersion Day has been a routine agenda for the English Department of Unika Widya Manda La Surabaya. In TID, students are obliged to talk in English all day long to friends and lecturers and even strangers or tourists. Before, TID has always been held in Bali, where all foreign-country tourists meet and gather. That way, it’s easy for students to make contact with native English speakers. Recently, the head of English Department gave a new idea which is to hold the TID in Singapore. Of course, pros and cons emerge. However, I personally agree that our next TID should be held in Singapore.

People who agree that next TID should be held in Singapore think that it is good because students are put in the real English speaker environment so they can practice their English a lot. Also, students won’t be able to speak in Bahasa Indonesia because little who understand Bahasa Indonesia in Singapore. The weakness of having TID in...
Bali, which is very students are still able to use Bahasa Indonesia when they are especially in traditional markets shopping and bargaining, won't occur in TID in Singapore. This is good mainly because students will need to talk in English all the time in the TID, which is the primary goal of TID. Furthermore, people who agree to the statement say that TID in Singapore will give students a lot of new experiences and expand their knowledge. There is a lot of new things to learn in Singapore, for example Singapore people's way of life, their habits that we don't have in Indonesia, the reasons why they can be so disciplined, etc. TID in Singapore will open the students' eyes and thus will stimulate them to learn and work harder so that they can be as successful as the Singapore people.

On the contrary, people who disagree that the next TID should be held in Singapore claim that TID in Singapore is expensive. Students will need to pay almost five times more expensive than the Bali TID at the shorter amount of staying time. Thus, they say, is not worth it at all. The other reason, they say, is that because of the high cost of Singapore TID, not all students can afford it. Of course everybody wants to go to Singapore, but some can't and it's caused by the money reason. People who disagree think that this may cause jealousy and the gap between the rich students and the poor will become further.

On balance, I think that it is OK to hold TID in Singapore as long as the students don't force themselves to join it. They may choose between the Singapore
Suppose T.D because I think it will benefit me more. I want to be in the
real English-speaking environment and I want to broaden my knowledge.

But T.D and they can join out of them with no pressure. Finally, I will decide.

Pro

- Improving our English maximally
- Getting new experience
- Getting a reference (about the study in Singapore, jobs, etc.)

Contra

- It spends much money
- We can practice our English more (in Bali, for instance)
- Some of us still had to pay the school fee

Singapore, NO ???

V TID or Total Immersion Day is one of the obligatory programs in our faculty. English Department. This program is held for the students of the English Department to improve on to

practice own English by speaking with foreign people. Almost every year, V TID is held in Bali and now

there is a new idea of TID's place, Singapore. Actually, Bali's not a new idea because our

senior would go to Singapore for their TID. I don't know why that idea was postponed. I may be

---

82
the reason was the price, too expensive. That’s only my opinion which was caused in my mind at the time. Now, that’s idea is showed up. The department invited us, the students, in Audition to discuss about that idea (TID in Singapore). The head and the assistant of the English department explained it briefly. I started from the cost until the details things. (I like how long we’ll go there etc.)

When I heard the cost, I was shocked at that time. I just talked to myself that I wouldn’t go there. Do you know why? (You’re right) because the cost is too expensive for me.

Of course, I have other reasons besides that. And I would like to explain my reasons about the cost. The cost is $3,75 million rupiah, that cost not include our passport and other document money. After I calculated, each student will spend at least $4 million rupiah. (Oh Aaa,..) how we can get that money?? From my salary as a private teacher?? That’s not enough, asking my parents? Sorry, I can’t. My parents don’t have that much money.

My second reason if we can practice our English here in Indonesia (in Car for instance) we can learn/improve our English here. It’s not need to go abroad (Singapore) wasting money.

My opinion is learning is depends on ourselves. It means that we have to motivate ourselves to improve our English, where we TID will be hold in. If TID will be held in Singapore, but we don’t have any motivation to improve it, that’s useless.

My third reason is some of us (the students) still hard to pay the school fee. How come we join the TID in Singapore if our school fee haven’t paid yet?? It’s impossible, right.

I absolutely believe that the student’s parents will choose to fulfill the school fee first and then pay
The TID's cost (if their money still left). Let me give you my expectation, all the students will gain the TID in Singapore and they will pay by their own money. (If student = $5 million rupiah including parent's pocket money). But the department will pay our school fee as the same as the TID's cost. Do you agree with me? Of course, you agree; you have to.

Actually, it's good (TID in Singapore) because I can improve our English meanwhile. It's difficult for me to speak Indonesian because almost Singaporean speak English. The situation can force me to use my English. The other reason is getting the new experience; speaking with foreign people in their country. The unforgettable experience in my life if I can go there. My last reason or in the other words, the other advantages is getting references about studying in Singapore, working in Singapore, the lifestyle, etc.

Finally, wherever the TID will be held whether in Singapore or in Bali, it depends on each student because it is optional. Students can choose one of that place which one they like more.

In conclusion, I don't agree if the TID be held in Singapore because it's too expensive for me. I prefer to go to Bali than Singapore, because the cost is cheaper, the nature is more beautiful and I will go there.
Appendix 5

TIO is the time that has been waited for a long time by students of the English Department of Universitas Widya Mandala Surabaya. It not only gives us new experiences traveling together with our friends, but also gives us a chance to practice our English with native people. It does sound contentious, but there is still always a controversial issue whether we have our next TIO in Singapore or Bali. Many of us came up with their own arguments to support having TIO in Singapore but in the world, of course, there is a pro and contra, that is why those arguments to have TIO in Singapore is disputed by students who want to have their TIO in Bali.

Because of that controversial debate, whether we have our next TIO in Singapore or Bali has not been decided until we get into one decision. I am as a student of the English Department of Universitas Widya Mandala Surabaya is absolutely have my own arguments too and if I may suggest, it is better to have our next TIO in Bali because of the following reasons:

1. 
2. 
3. 
4. 
5. 
6. 
7.
Font that may be too small reading. TTD in Singapore is interesting.

We can have new experiences of traveling abroad with friends, meeting new people, and the chance to go abroad, this is especially for those who have never been abroad, but it costs a lot. Why should we spend our five million rupiah in Singapore just for one day while we can spend that amount in Bali for two until three weeks and come with full of shopping bags in our hands?

Second, Indonesia has many islands that have many good and interesting places to be visited, such as Lombok, Gili Islands. Bali is as famous as Singapore, even more. Many foreign people want to go to Bali so that we should be proud to have our native TTD in Bali. We can enjoy the beautiful scenery, the beach, and have shopping with a reasonable price.

Third, many students argue that we can improve our English with Singaporeans and there are not so many or Indonesians in Singapore compared to Bali so that we can truly practice our English. It sounds great but in Bali, we can practice our English with western people, the local Americans who obviously have better pronunciation than Singaporeans. And it is unnecessary to speak English all the time, I think it doesn’t matter although there are many Indonesians all around us.

Finally, I’d like to say that whether we can enjoy our life is based on mood. If we thank God for all His blessings, our life will be beautiful. Our beautiful
Life is not because of we go to Singapore or not, but because of our thank to God.

Wherever we go, Singapore or Bali, I hope we can enjoy our trip and have a wonderful moment with our friends.
Appendix 6

Speak English all the time is a good way to learn English.

Should we, English department students, speak English all the time? As a student in the English department, I agree that all the English department students should speak English all the time. I think it's good for us, since it will give us many benefits for ourselves. (This is already correct.)

The first reason that make me agree with that is we can increase oral and written in English. Everyday we learn English in class, we also speak English, but later on when we outside we talk with our native language. By making the environment in English department is conditioned as English speaking area, we have to be able to talking, acting, writing or even gossiping in English language. Later on, sooner or later, major skill in English is going to increase significantly.

Then, by having the environment conditioned, we get used to talk in English almost or daily life: school life, to discuss about homework or report
With our friends, or lecturers, when we used to speak in English, slowly
our mindset has some changes. As an example, when we want
to talk or explain something in English, some of us are thinking about
things using Indonesian language then we translate it into English,
than we say it. But then after we used to speak English all the
time, our way of thinking is not think about the things in our
mother language first then translate it into Indonesian. No. As we
already used to. We directly thinking about things in English
language, then we say it. It can happen because first we are
used to be conditioned to think and speak using English. And
then we will not get nervous again whenever we have to talk
in English. How about this, you?

Then, it can motivate us to be better and better. Because
as we speak in English is a must, we feel ourselves to learn English
then practice it. Because when we aren't able to speak well, it's
hard for us to communicate with other people in our department. Since
we also don't want to be looked at as a stupid person, we also
have to improve our skill. But, I believe that every human have
different ability, some people become fast-leaner, but some become
slow-learner. But I also believe that the best way to improve our
Skill is by doing it while we also learning it.

For some people, they may say that we, English department students, shouldn't speak English all the time in campus. Because they think that it's futile useless and many difficulties will face this program.

We all know that there are only few staff in English department who can speak English. For we, as students, and teachers will find few difficulties in running this program. But for the administration staff, cleaning service staff, canteen staff, and the security, they aren't able to speak English all the time. So it's quite hard for them and us, as students, to communicate in English.

If this program gets realized, I think in the first month we will find some difficulties to adapt with this situation. One of them might be faster like the illustration that I have explain above. Some of students also need time to speak English fluently. They also need time to get much vocabulary in case to speak fluently.

As I have explain, the pro and contra reason based on this situation. Now it's depend on whether we want to get better or not. Because whatever the decision we take, there are some consequences that we have to receive. And when we decide to make this program run, we have to find some solution to overcome the difficulties that might raise.
