This thesis entitled “THE EFFECTS OF USING PICTURE-SERIES WITH ORAL QUESTIONS ON THE NARRATIVE WRITING ACHIEVEMENT OF THE ENGLISH DEPARTMENT STUDENTS OF WIDYA MANDALA UNIVERSITY”, prepared and submitted by Lispin Haryadi, has been approved and accepted as partial fulfilment of the requirements for the Sarjana Pendidikan Degree in English Language Teaching by the following advisor:

DR. VERONICA I. DIPTOADI, M.Sc
Advisor
This Thesis has been examined by the committee of an oral examination with the grade of .................. on February 27th, 1998.

Drs. M.P. Soetrisno, M.A
Chairman

Drs. Stefanus Laga Tukan, M.Pd
Member

Dra. Susana Teophilus, M.Pd
Member

DR. Veronica L. Diptoadi, M.Sc
Member

DR. Veronica L. Diptoadi, M.Sc.
Dean of the Teacher Training Faculty

Dra. Agnes Santi W. M.Pd
Head of the English Department
ACKNOWLEDGEMENT

This thesis is submitted as a partial fulfillment of the requirements for the Sarjana Pendidikan degree in English Language Teaching of Widya Mandala University, Surabaya. Above all, the writer would like to thank God for His Grace, Providence, and Guidance given to her to finish her thesis well. Then, the writer would also like to express her deep gratitude to the following people who have helped her with their valuable advice and guidance:

1. DR. Veronica L. Diptoadi, M.Sc, the writer's advisor, who has spent her valuable time and efforts to guide and encourage the writer in accomplishing this thesis.

2. Dra. Agnes Santi Widiati, M.Pd, the head of the English Department, who has encouraged the writer to take the oral test of this thesis as soon as possible and who also has given a moral support for the writer.

3. Drs. I. Nyoman Arcana, who has guided and given information to the writer concerning with her research.

4. Drs. M.P. Soetrisno, M.A, who has been willing to give chance to the writer to apply her technique in his class.

5. All the library personnals, who have helped the writer in giving much information for writing this thesis.
6. Yoni Saputra who has been willing to spend his time to be the first rater of this study.

7. Emilia Tjandra, the writer’s best friend and also the second rater of this study, who has helped and encouraged the writer to finish this thesis.

8. Ir. Dominicus, the writer’s boyfriend, who has supported and encouraged the writer to accomplish this thesis.

9. All beloved friends and family who have given all the supports and encouragement to the writer.

Without their kind help, the writer is sure this thesis would never have been accomplished as the way it should be.

Surabaya, February 20\textsuperscript{th}, 1998

The writer.

38. The Findings based on the Writing Assignments.

39. The Findings based on the Level Criteria Type of ESL Guidelines.
ABSTRACT

Eventhough there are four important language skills taught in English Language Teaching, not all students can master them very well especially when it comes to writing skill. Many of them consider writing as a difficult skill to learn. During the writer's study time as one of the English Department students of Widya Mandala University, she also observed that many students complained when they were asked to write a certain type of writing, eventhough the type of writing was the easiest type such as narrative writing. Mainly and commonly, they have difficulties in getting the ideas and how to put the ideas into the paragraphs which are linked to one another.

To overcome those problems above, the writer tried to conduct a new technique in teaching writing through Picture-series presented with oral questions. Since the most easiest type of writing is Narration, then in this study, the writer only discussed the application of her new technique that is Picture-series to teach narrative writing.

The population of this study was the first semester English Department students of the year 1997-1998. The samples were taken not randomized but the classes were used as they were. Here, the writer would use two classes or groups as the samples. Then, both of them were given different treatments. Group A would be the experimental group, the group who would receive Picture-series with oral questions as the treatment. Group D would be the control group, the group who would receive List of Vocabulary with headings as the treatment. These treatments were given three times before the writer conducted her real post-test to both of the groups.

To analyze the results of the treatments and post-tests of the two groups, the writer used t-test to find the answer to the question and simultaneously to test the hypothesis of the study whether the null hypothesis is accepted or rejected. The null hypothesis of this study was: there was no significant difference between picture-series and oral questions.
series technique and list of vocabulary technique on the students' narrative writing achievement. While the alternative hypothesis of this study was: there was a significant difference between picture-series technique and list of vocabulary technique on the students' narrative writing achievement. The results of this statistical calculation indicated that the students treated or taught with Picture-series and oral questions (group A) got higher or better scores than those who were taught with List of Vocabulary and headings.

The mean of the experimental group was 83.75 while the mean of the control group was 76.575. The obtained-t value of the post test conducted was 2.226552 and the t-table was 1.725. Since the obtained-t was higher than the t-table, hence, the writer could conclude that the null hypothesis (H0) was rejected and the alternative hypothesis was accepted. In other words, there is a significant difference between the writing achievement of the students taught with Picture-series and oral questions than that of the students taught with List of Vocabulary and headings.

Finally, the writer realizes that this thesis is far from being perfect. Thus, she really hopes there will be further researchers and related studies to be conducted so that the more generalize results can be attained.
