Acknowledgement

First of all, I am so grateful for God’s blessings and guidance in granting me this opportunity, time, and materials means to pursue this study.

Special thanks to Dr. Ignatius Harjanto, my thesis advisor, for his unfailing availability for me to have his mentorship and expert advice whenever necessary. My thankful heart also goes to Prof. Dr. Anita Lie, Ed.D and Prof. Dr. Agustinus Ngadiman for the invaluable input and encouragement during the seminar proposal and thesis defense. I also thank all lecturers of MPBI Widya Mandala Surabaya for having contributed somewhat to this study with their knowledge through the lessons, all administrative staffs for providing support during my college, and all my companions in arms, MPBI 18 colleagues, for giving me unforgettable memories through the friendship and enjoyable moments spent in the classrooms.

The deepest appreciation goes to Mrs. Nanik, SPd., the headmaster of Baratajaya Elementary School Surabaya for allowing me to conduct the research, to Mr. Hasanuddin, SPd., my colleague, for his willingness to be an observer in this research, to all Class 5E students for participating in this research, and to all teachers and staffs of Baratajaya Elementary School Surabaya for providing support during the research.

From the bottom of my heart, I would like to address my thankfulness to my beloved wife for always supporting and encouraging me to complete my college. I am so grateful that we, as partners in life, could get through of many ups and downs by praying and working a lot especially for my study which could be finally finished on time. Last but not least, I would also like to enounce my deepest gratitude to my parents, all my big family, and friends for their love and support for me in various forms and occasions.
Abstract

Keywords: Vocabulary Mastery, Vocabulary Improvement, Local Cultural Content Materials, Vocabulary Learning, Schemata

The Elementary students of a certain public school in Surabaya had difficulties in learning English. One of the crucial problems was learning English vocabulary. In attempts to help the students learn and master the English vocabulary, the researcher decided to use CAR to teach English vocabulary with local cultural content materials. The aim of this study was to investigate how the teaching of English vocabulary with local cultural content materials could contribute to the improvement of the students’ English vocabulary mastery.

The topics of the learning materials were selected based on Second Language Acquisition theory; the input hypothesis (i+1) claims that schema is the most appropriate comprehensible input. The two principles of schemata - connections and prerequisite knowledge - were used to develop the lessons to help the students learn and understand the English vocabulary. The topics covered in the materials are the students’ personal lives and the students’ surroundings. The activities consisting of brainstorming, role playing, doing illustrations and visual aids, reading passages, explaining meanings of new English words, doing exercises and worksheets were connected to the students’ schemata.

The CAR was conducted in three cycles spanning about six months, with four topics covered in each cycle. The lessons were observed by an English teacher and all classroom activities were noted in the observation sheet. Triangulation was done through interview to the students, the observer and document analysis. The vocabulary tests were administered for each cycle with overall assessment of all the lessons done at the end of all cycles.

The results showed that the teaching of local cultural content materials in English vocabulary learning contributed to the improvement of the students’ vocabulary mastery with different degree. Students who were familiar with the topics could respond the teaching more enthusiastically and improve their vocabulary mastery better than those who were not familiar with the topics. It was also found that the highest gain scores were obtained by the students who participated in both classroom and outside vocabulary learning.

The success of the lessons was mostly due to the classroom vocabulary learning, especially ‘brainstorming’ and outside vocabulary learning through ‘worksheet’ which were absent in previous English vocabulary learning materials. In addition, the teacher’s ability to respond the students’ ideas during the brainstorming activity was also claimed to be critical to make the lessons successful.

To conclude, the teaching of local cultural content materials have contributed to the improvement of the Elementary students’ vocabulary mastery in varying degree depending on the students’ familiarity with the topics and on the students’ participation in both classroom and outside vocabulary learning process. Perhaps future studies could be carried out in a more experimental manner to quantify the results of this study or to implement other CAR type of research on other cultural aspects.
