"How Well is Your Vocabulary Mastery?"

Genre: "Analytical Exposition Text"

Picture 6.1. Trial 1 (Page 1)

This is the First Reading of the First Trial of the Vocabulary Testing Software given to the subjects. The title is “Use of Formalin and Other Additives in Foods”.

![Use of Formalin and Other Additives in Foods]

The use of formalin and other dangerous preservatives in foods has been a serious problem for three reasons.

Firstly, formalin is not for human beings, but it is for biological specimens and experiments. Formalin solution is a lethal solution of formaldehyde in water which is usually used as a disinfectant or to preserve biological specimens. Thus, it is not for food preservation. Of course when it is used for food preservation, it will be very dangerous to humans’ body.

The second reason is that there is no tight control from the government. This condition makes the people’s health is really a threat. When the control is weak and the use of formalin was spread wide all over the Indonesia regions, and those days it has really happened, the citizens’ bodies will be badly contaminated with the poison. Fish or food dealers still sell their products which contain formalin and dangerous preservatives. Can you imagine that our digestive system absorbs the substance that should be for the human and animal corpses?

Consider the reasons, we can make a conclusion that the use of formalin and other preservatives is really a serious problem if it is not resolved immediately.

This is the Third Reading of the Second Trial of the Vocabulary Testing Software given to the subjects. The title is “*The Power of Music in Our Life*”. The complete reading is given below:

![The Power of Music in Our Life](http://understandingmusic.org/2013/03/power-of-music-in-our-life/)

Do you agree that music is important in our life? Yes I do, music has certain role completing our day to day activities. Here are some reasons why music is heard everywhere and anywhere.

Music is a way to express feelings. When we fall in love, the kind of music we’d listen to would be all about love. When we’re sad, we would go for music that is melancholic in nature and immerse ourselves in the sadness. When we’re happy, we’d choose songs with happy tunes too.

Song can help to memorize the last experiences. A favorite song is a powerful document.

People with Alzheimer which are impaired the brain would remember details about songs they were familiar with. For example, an elderly woman who couldn’t even remember her husband’s name would remember the details of her favorite song when it was played, how it made her feel and things about the song that made it especially memorable for her.

Further, music can unite people for a cause and changes the world. A song with good lyric and striking deep chord can stimulate the universal feeling of all people. We can see it in the case of the famous and legendary Michael Jackson’s “Heal the World”. It can arouse humanism of a lot people in this world.

So what would the world be like without music? It would be lonely.

This is the Second Reading of the Third Trial of the Vocabulary Testing Software given to the subjects. The title is “The Unhealthy Fast Food”. The creator of this vocabulary testing courseware change the position of the source from the second line of the page to the bottom left corner of the page. The complete reading is given below:

**The Unhealthy Fast Food**

Fast food nowadays is considered a normal eating venture. People are not just eating out on special occasions or weekends anymore. It means that all the time they mostly eat fast foods. However is fast food good for health?

Fast food has its popularity in the 1940s. Within a few years, fast-food operations popped up everywhere. With the compelling rise in fast-food restaurants since the 1940s, oddly it started the rise in obesity and cancer during that same time period.

Fast food is highly processed with a wide array of additives. To ensure fast food's low cost, the fast food products are made with highly-processed ingredients to give it shelf-life, to hold consistency, and to enhance flavor. Fast food is altered from its original healthy form.

It is not the calories in fast food which damage health and waistline. It is the chemical additives such as aspartame and MSG (monosodium glutamate). Studies show that the chemical additives lead to weight and disease issues.

So, there is absolutely nothing nutritional about fast food. Fast food simply feeds hunger and craving.
