It was started with the case which happened in Jakarta International School. A Pedophile who worked as a school cleaner at JIS sexually abused 5-year-old student. Then, a pedophile was caught by the police in Surabaya after posting inappropriate photographs of children he deceived.

While they are in prison, they must have to hold back their sexual desire; however, if they are released, they will tend to fulfil their desire which has so long been denied.

Chemical emasculation will weaken or even obliterate pedophiles’ sexual desire, so after they are free from prison, they will have no force which drives them to repeat their actions.

Chemical emasculation has severely frightening and fearful impression. This can help government and law enforcements promote fear among the pedophiles. When fear has been promoted, pedophiles will be forced to at least think twice before committing their actions. Once they’re caught, it is possible for them to be punished with chemical emasculation. When they’re thinking this way, they will be unlikely to commit actions which always run in their mind because it can mean suicide.

Still related to the previous point, it will promote fear, and when fear overcomes many intentions of pedophiles to commit their actions, they will force themselves to find proper treatment (psychological therapy, etc).

When this possibility reaches at zero level, Indonesia will be free from pedophiles though it may take very long time.

First reason is disturbing the concentration for the student if the students bring mobile phone in the class, the students can not concretate with the explanation that the teacher gives to you because of the ringing mobile phone and the message can cause students do not get anything from the lesson.

The second reason is making the students lazy.

Models of the Students’ Writing

(Most are retyped since the comments of the respective lecturers were written on the final test results)

Paper 1

The use of cellphone should be banned in the classroom.

Cellphones with all its features have already been a growing need for the students nowadays. With the technology of the cellphone, the students can always communicate easily with their friends without any problem. The use of cellphone is so easy and so useful for them, and it makes the students sounder compliant on their curiosity mind that should be taken.

As we go with that thought, some might say that cellphone use should be allowed in the classroom. I am against this revolutionary thought because I believe that the use of cellphone in the classroom distracts the students’ attention, disrupts the teacher, and also hinders the students’ growth.

The last thought is cellphone will distract the student’s attention from the teacher. If a cellphone suddenly rings in a classroom, I have no doubt that everyone will be distracted. Their attention will be distracted.
Appendix 3

or interrupted by the noise from the classroom. The concentration will break for sure and it is already become an obstacle for the students to learn from the teacher. Of course your teacher will also be upset because of his lecture is interrupted. Another problem is when the other students hear the noise or see some of them are heading to class they will also start to check their cellphones just as one student was seen. It is already become another level of distracting. Not only do for a few seconds but also half of the class of maybe 20 will be distracted for a longer time because they find something to be replied on their cellphones.

The second problem is the use of cellphones in the classroom can disappoint the teacher. The teacher will be disappointed because he tries to deliver his knowledge with all of his heart content to you and he finds out that some of his students pay no attention while looking at their cellphones. He will be upset for sure. In this situation, the students may get explodes by the teacher and it makes them feel humiliated in front of the classroom and worse, the teacher may make their name and advise them issues, issues of the behavior problems.

Finally, it can lower the students' grades. Just imagine they are learning nothing for half of students holding their cellphones of course, the grades will drop. They will no longer listen to the teacher.
because they are too busy with their assignments; what makes them
will learn nothing from the teacher, when the time of examination.
they will be surprised because of some of the questions can be answered.
They will have final seeds and it will lower their grade.

To conclude, the use of surprises should be prohibited in the classroom
because there is no advantage of it. It may cause distraction, the
teacher will feel upset and also lowering the grade. I once again say
that I am fully aware of the usefulness of surprises but it does not
mean it can be used anywhere; surprises can clearly be used but not
in the classroom.
Every year, the number of people dying from smoking activity is getting increased. As we now know, smoking brings many health problems, such as respiratory problems, lung cancer, heart disease, high blood pressure, etc. Governments in various countries have already done some work to reduce the number of people who smoke. One of them is by banning smoking.

Banning smoking regulations have already been run in some countries since it is believed to be the most effective way. Yet, by banning smoking, the government fails to do its main objective, that is, to provide welfare and democracy to its society. Some reasons that should be considered are the personal choice, understanding, different thinking, safety awareness, and job field.

The first and most important thing to be considered is the personal choice. Personal choice is the right that should be fulfilled by the government after the society has done their obligation. For example, pay taxes and obey the rules. The government should not interfere with the right of the society. It is their own choice what they want to do, including smoking. Government should monitor more important things, like providing the basic needs of the society.

The second reason why anti-smoking laws by banning smoking could not be done is because the government underrates the citizens' thinking. It is believed to be done at the government's discretion.
Appendix 3

tell the society what should and should not to do. It seems like the government doesn’t respect the capability or logical thinking of the society; therefore, the government made a law to control their own choices. Nobody is forced to keep smoking; however, nobody is forced to quit as well. In fact, banning smoking will lead to another problem which is food self-awareness. Because, the rate of smoking highs, people quit smoking. They don’t stop smoking because they know that smoking has a bad effect on their health; rather than getting caught by police because of breaking activity, smokers will pretend to quit smoking. Ironically, when they have a chance to smoke, they will do it again or even worse. From this case we can infer that banning smoking would only create more self-awareness that would not vanish in the future.

The last reason that also important to be considered is about the job issue. It has been known for a long time that cigarette factories provide a lot of job field for the society for now or later, and another town will affect those who are included in it. Many of them will lose their job, and become jobless. How the government can continue such a lot number of low opportunity. Given previously by the cigarette factory, it will not be as easy as giving a hand. Later on sooner, the welfare and prosperity of the country are affected by it.

To sum up this lesson, I believe that anti-smoking laws need to be discussed again for its importance in the future. We can’t simply propose to ban smoking once cigarette and its factories give a lot of contributions to the country. It does not always about job creation, but also taxes and many scholarships come from it. As a democratic government, it should also respect the freedom of personal choice of the people. The society is responsible...
for themselves, i.e., covered their own 'body autonomy'. They can do what they want as long as they don't harm other people.

The Using of Cellphone in Class

Phone, something that is not really rare anymore, almost everybody has it. About 10 or 15 years ago, phone was only used by rich people with a lot of money, but now many cell phone companies have produced their own type of phones with different price. However, some of them create phone that can be bought by low income family. Teenager are one of the customers, they want to have the best and newest phone that they can get. They feel like the phones is the part of their soul, so they can’t leave them at home. They have to bring it everywhere. Because of this situation, they tend to bring it to school even though they’re already knew that they’re not allowed to. There are so many people who talked about this problem, whether the students are allowed to bring phone in class or not. Some say yes and some are the other way around.

Sure, phone is something that can be useful when you need it the most. For example, in the middle of having class, you fell sick and you want to go home, then you can use your phone to call your parents and pick you up. However every school in this country, well not just in this country but all over the world provides phone inside the building, so you can just simply ask for help to one of your teacher to call your parents. So many students having making this situation to become such a big problem just so that they are allowed to bring it.

Another problem is it will be a disturbance for the teacher while having a class because students tend to play with their gadgets and not listen to what the teacher says. Also the students are less likely to
Appendix 3

understand the material because they’re to busy with their gadgets, chatting, upload their status on facebook and twitter, post photos on instagram, or even play games. Moreover, if the students are allowed to bring their phones then they will use it to cheat in quiz or even in examination. They will find the answer on the internet and just simply copy paste it.

However, a lot of student protest that if they are not allowed then the rule of not to bring phone in class should be applied on teachers too. In fact, they feel like the teachers have abused their power of being teachers, they act as they like. For example, use the phone in class whenever they want to, make a phonecall while having a class and for some teachers, they even play games while the students are still having a group discussion. As teachers, they should act a little bit better than that, they have to realize that teachers are the role model in class. The students act what they are taught to be like. Teachers have to respect if they want to be respected. Sure the teachers have a lot of activities, but they have to be wise in organizing the time, if you’re still teaching then put your phone in silent mode , and leave it at your office or just simply put it in your pocket.

So, cellphone shouldn’t be brought or used in class because it will be a disturbance while having a class. This rule is applied for both students and also teachers. After having a class then you can just go back to your beloved phones and play with it again.

Paper 4

No Mobile Phone in Class

Nowaday, mobile phone is one of the most important things that everyone have to buy. Starting from the olders, teenagers, and children, they know about the mobile phones and they have it. Because of the benefit from using mobile phone every people really interested using it, especially for teenager. Research believed that teenagers are the greatest user of mobile phones. So, teenagers will always bring their mobile phone everywhere and anytime. They will not to forget to bring mobile phone, it is mean that mobile phones is everything for them. Moreover they thing that using mobile phone make them more confident and popular. It sound like mobile phone is the part of their life, so they cannot life without mobile phone.

In this modern era, using mobile phone is allowed in everywhere, even though in school. Some school today allow their students to bring mobile phone. The reason why they allow their students to bring mobile phone is because to call their parents if there is something important, also because the international school so mobile phone is allowed and other reasons. However, mobile phone is also have bad thing or bad effect for the students, more over if they bring mobile phone to the school and using it in the class. School should not allow their students to bring cellphone and using it in class. Because of mobile phone can disturb class, it also will make students unfocus in lesson, students will cheat-browsing the assignment given using internet in cellphone. So I do agree if no cellphones in class.
Appendix 3

First reason why mobile phones is not allowed in class is because it will disturb the class. When class starting and the teacher is explaining the material, suddenly one of the student’s cellphone is ringing. It will disturb the class and the whole students. Moreover, where there is a quiz and the students are focusing their mind in quiz given, then suddenly one of the students cellphone is ringing, it will very disturb them and make their focus become unfocus. So, it better if cellphones is not allowed in class.

Second reason is students will use cellphone in class everytime eventhough the teacher teaching and explaing the material or the lesson. With the fitures that cellphones have nowadays, students will not listening to teacher. They will busy with their cellphone, play games, take photos with their friends, brows in the internet, and use social media. Students will not liste to the teacher, they prefer to chat with their friends in social medias, like facebook, twitter, wechat and many others. So if they are allowed to use cell phone in class it very impossible to them understand the lesson because they will busy with their cellphones.

The last reason why cellphone should not be allowed in class is to prevent students cheating during the quiz. With cellphones students can do anything or brows anything that they want to know. They can watch any movie that they want to watch, everything is possible using cellphones. Also with cellphone students can be lazier, because they can open the internet to find the assignment that their teacher give. It will make student lazy to think, they will just open the internet and searching for the answer then copy paste. For example if they are given assignment about descriptive text and their teacher asked them to make example about it. They will just
Appendix 3

browsing in the internet to find the example about descriptive text. There is a lot of example of it in the internet, so they just copy the article that they choose and write it down. Because of this reason cell phones should not be allowed to bring in class by students.

I think these three reasons is enough to inform the readers about the bad things of allow students bring cell phone in class. I believed that cell phones have bad effect for students in class. It is fine for students to has cell phones because it’s modern era, but don’t bring them when school. So they can more focus in class and listening the teacher. They can learn much from the teacher about the lesson. Because the goal of school is to get knowledge for better future not for playing cell phone and make them lack of knowledge from teacher. Also, they can play or using cell phone as much as they want out of school.
Installing CCTV in Class Brings Many Benefits

Many cases of inappropriate attitude in school have happened. The most vivid one in our memory might be the case of JIS (Jakarta International School), where one of the students was harassed sexually by one of the employee of the school. It is so unfortunate knowing that school is already like the second home for students that should provide security beside knowledge, but failed to do that.

Many things can be done to prevent those unfortunate cases. One of them is by setting or installing CCTV in class. Installing CCTV in class has a lot of benefits. Beside preventing inappropriate attitudes such as bullying, theft, and sexual harassing, CCTV can control the behavior of students and also can be benefit for teacher’s evaluation.

By installing the CCTV, school has provided a security for the students. When CCTV installed people who looked at it will automatically feel like there is someone who’s watching them, therefore they will act more careful. Of course someone who has the authority of operating and monitoring the CCTV has to be a person that is trusted, like the headmaster of the school. The CCTV is always “On”, so the school would know if there any intruders or misbehave happen in the classroom. Students who are also realized that they are being watched would be afraid of doing inappropriate behaviors like bullying or stealing things from their friends. Therefore, installing CCTV in class can prevent misbehave of students or any citizen of the school. In such cases like the theft,
Appendix 3

bullying, or sexual harassing is already occur, the school still can catch the culprit by looking on the video footage.

Installing CCTV in class can also control the behavior of students. It will ensure that they are doing their work properly, not just goofing around with other students. It makes them more discipline and prevents them to cheat during tests. These might put them pressure too, knowing that they know they are being watched all day and can do no wrong. So, the teachers have to be creative to let their students express their feelings and creativity in class. The teacher have to ensure and encourage the students to be creative that it is okay to make mistakes because we learn from mistakes too.

Teachers can also be benefit with the installation of CCTV in class. They can evaluate their performance in class by looking on the video footage. CCTV is recording all day, any events that is happened during teacher’s teaching material is of course recorded too. So, teachers can use these footage to reflect on their own teaching methods, whether the methods they use that day in class is effective or not. By doing this, teachers can improve greatly which can also be benefit for the students.

In conclusion, I believe that installing CCTV in class is worth to do. Although, it may seem would cost greatly, but the school should focus more on the beneficial gained. Installing the CCTV can create a security system that prevents theft, bullying and sexual harassing which is “booming” in our country. It ensures the parents that their children are safe. It also makes students discipline and do their homework diligently. The teachers can also use it for their evaluation of their performance in class, which can improves their methods in teaching effectively for students. Setting CCTV in class may
Appendix 3

pressured the students in class, as they feel like being watched all day, but if teachers do their role in encouraging and believing in their students’ performance, then CCTV can do no harm in students’ active performance.
Chemicals Emasculation – The Ultimate Way to Fight against Pedophiles

During the latest three months, lots of Indonesian people have got shocked and hurt by many reports on crimes done by pedophiles. It was started with the case which happened in Jakarta International School. A Pedophile who worked as a school cleaner at JIS sexually abused 5-year-old student. Then, a pedophile was caught by the police in Surabaya after posting inappropriate photographs of children he deceived. The most shocking one might be the case of Emon. Emon is a pedophile who sexually abused more than 100 boys living around his neighborhood. Up to today, lots of other cases have been reported by media related to the presence of pedophiles and crimes they have committed.

The increasing number of crimes done by the pedophiles should be enough to make our government realize that the applied law in Indonesia for pedophiles is very weak. The maximum sentence a pedophile can get in Indonesia is being in a prison for 15 years. The new law as a punishment, which is more severe and stronger, is now needed. One new possible punishment is chemical emasculation. Chemical emasculation is a process of injecting a chemical substance called anti androgen to weaken or to finally obliterate the force coming from the testosterone so that someone will have no sexual desire anymore. This kind of punishment has been applied in many countries. Germany, South Korea, Japan, Israel, and Estonia are some examples of countries applying chemical emasculation as the punishment for pedophile. The latest development, in 2013, Turkey
Appendix 3
also decided to legalize it as a new punishment option. If chemical emasculation is legalized and applied as the punishment for pedophiles, government and our law enforcement will be able to prevent pedophiles to repeat their action, spread fear among the pedophiles who are willing or planning their actions, and reduce the possibility of the regeneration of pedophiles.

As stated in the background, maximum punishment for pedophiles in Indonesia is very weak. Maximally, pedophiles will be sent to live in prison for 15 years. It means that they can be released sooner than 15 years. While they are in prison, they must have to hold back their sexual desire, however, if they are released, they will tend to fulfil their desire which has so long been denied. This intention can lead them to find other victims and repeat their crimes over and over again. Therefore, chemical emasculation is needed to anticipate this. Chemical emasculation will weaken or even obliterate pedophiles’ sexual desire, so after they are free from prison, they will have no force which drives them to repeat their actions. Pedophiles are psychologically ill, they can’t control their mind and desire. They also can’t think logically and differentiate which is right or wrong. Based on those considerations, chemical emasculation is a major breakthrough to prevent them for repeating their crimes. On the other words, it will release them from their nightmare which always drives them crazy.

Chemical emasculation has severely frightening and fearful impression. This can help government and law enforcements promote fear among the pedophiles. When fear has been promoted, pedophiles will be forced to at least think twice before committing their actions. Once they’re caught, it is possible for them to be
Appendix 3

punished with chemical emasculation. When they’re thinking this way, they will be unlikely to commit actions which always run in their mind because it can mean suicide. Spreading fear brought by punishments, since ancient time, has been proven to be effective in dealing with serious threat, and it is expected to remain effective if applied in Indonesia related to our law which is very weak and has been proven not to promote any fear among pedophiles.

If chemical emasculation is applied, the possibility of the regeneration of pedophiles will be reduced. As we know from the latest shocking news about Emon, previously, Emon was a victim of crimes committed by another pedophile. Lots of pedophiles were previously victims of similar actions the ones they committed. It means, if pedophiles continuously do their actions, the regeneration of pedophiles will always continue. To reduce and eventually bring this kind of regeneration to its end, chemical emasculation is needed. Still related to the previous point, it will promote fear, and when fear overcomes many intentions of pedophiles to commit their actions, they will force themselves to find proper treatment (psychological therapy, etc). This means less crimes committed related to the actions of pedophiles, and this will result in decreasing possibility of regeneration of pedophiles. When this possibility reaches at zero level, Indonesia will be free from pedophiles though it may take very long time.

Considering and remembering that our maximum punishment here in Indonesia is very weak and the number of pedophilia cases keeps increasing, government should think the more severe punishment to fix the situation. Chemical emasculation is the best option. By legalizing chemical emasculation, government will
Appendix 3

prevent pedophiles from repeating their actions, spread fear among them, and strive for bringing the regeneration of pedophiles to its end. Chemical emasculation will definitely save the future of many innocent children.
Do not Bring Mobile Phone in Class

Mobile phone is widely used among the people especially for students. They use mobile phone for communication, browsing and taking photo. They bring it everywhere they go. As the student, Do you need to bring mobile phone in class. The answer is not. As the student, you do not need to bring mobile phone in class. these are three reason the students do not need to bring mobile phone in class: such as: disturbing the concentration, make the students lazy and cause the student dishonest about the test.

First reason is disturbing the concentration for the student if the students bring mobile phone in the class, the students can not concentrate with the explanation that the teacher gives to you because of the ringing mobile phone and the message can cause students do not get anything from the lesson. The students also do not listen the teacher explanation and busy with yourself. Although, the phone and the message sometimes do not important than the material. The students prefer to concentrate with the message that do not important, it can cause you the bad mark because you do not concentrate well with the explanation from the teacher.

The second reason is making the students lazy. When the teacher gives some exercise to the students, the student feel lazy to do this because the student can browse anything from mobile phone and get the information that they need to do the exercise. The students do not need to do that. Beside they can browse it from the internet, or they can copy it from their friend. Then the students can
Appendix 3

play with their mobile phone and do not need to do the assignment or exercise that the teacher gives.

The third reason is causing the students become dishonest about the test. If the students do the test because of mobile phone. They do not need to study anymore. They can take a photo from the book or they can get the message from their friend that include the answer of the test. It can cause the teacher do not know the ability of the students because the result of the student do not accurate.

These are some recommendation that the school can do to prevent the students to bring mobile phone in the class.

1. The school can ask the students to entrust their mobile phone with the teacher during the class. The students can ask their mobile phone back, after the class is over.

2. The school inspect the clas. The teacher can ask the students to open the bag. And the teacher can know the students entrust their mobile phone or not

3. Turn off the wifi during the class. some student feel bore during the class and browse in the class. This can disturb their concreate during the class. The school can turn on the wifi during when the class is over or during the break.
Let’s Be a Safe Driver

As we know that the rate of accident happened in our country is quite high. Not only in our country but almost around the world, the accident’s rate is quite high. What makes this things happened is many children at the age 12-15 years old driver their vehicle with a quite high speed. They also do not have a diving license. Maybe their parents also do not care about them until they have got an accident their parents just realized. Because of that things, we agree that a boy or girl who reach 21 years old, they are allowed to make their driving license of them. If they are not 21 yet, they could not drive wherever they want. There are three reasons that I want to explain about why we legalized the driving age around the world at the age of 21: they are emotionally ready, they are psychologically ready, and they are mentally ready.

The first reason is they are emotionally ready at the age of 21. Why I said so/ because as I know, when the children reach the age of 21 they are totally mature and they are not children anymore. They are adult who has no idea about a competition things that can lead to a dangerous risks. So, the children at this age will choose to be a safe driver than a dangerous driver. They will not think about many things that can lead them to that. If the children under 21, they will show off about their ability in driving and they drive with high speed without thinking about the risk. That is very dangerous things. I will you an example about the dangerous things: we know that more or less one year ago, there is a case about Ahmad Dani’s son. He drove his car with a very high speed. He did not even think about the risk.
Appendix 3

After that, his car is out of control so that the car go onto the other side of the street. The effect is his car broken but luckily he is still alive. We see that it better to legalize driving license if the children has reach 21 years old.

The second reason is about psychologically ready at the age of 21. They will be psychologically ready because from the psychological side, when they reach that age, they will psychologically mature. They have already growth and their cognitive skill is also enough. They know how to behave, they know how to control themselves, and the pride of theirselves is not as high as they were children. So, they can drive safely. They can think logically and can think about the danger of something.

The third reason is about mentally ready. If I said mentally maybe it is a little bit abstract because we do not even know how to measure the readiness of their mental. But through their experience of life, they have already trained to be mentally ready to do anything. Mental here is very important things because while we are driving we need our mental to prepare everything that might be happened. For example: when we drive our car, the street could be very crowded and there are many cars and motorcycles that will accompany us in the street. The cars and motorcycles can attack us if the driver lost control. We as the driver of our car should be mentally ready. If we are not ready, we might have another problems with the people around us. It is a good way if we legalize the driving license when we reach the age of 21. Because we already emotionally, psychologically, and mentally ready. Not only that, we can also decrease the rate of the accident that happened in this world.
Appendix 3

Here I will give you 3 recommendations to be a safe driver:

1. Obey the law that valid in your country about driving things.
2. Obey the signs that appear along the street.
3. Prepare your emotion, psychology and mental before you start driving.
Let’s Welcome the College’s Uniform

After we graduate from Senior High School, one thing that makes us really happy is an idea that we will be free from the responsibility to use uniform every day. We don’t need to see the same person with the same clothes every morning in the mirror. We will have freedom to wear anything we want and it will be so fun to use colorful clothes every day. For some of us who like shopping, no more uniform means that we can go to the mall more often and buy new clothes as much as we want, then it also means that we can follow the newest fashion-trend which can encourage our confidence of ourselves. In fact, no uniform is actually can put us in many problems like wasting money for a temporary satisfying (to buy new clothes and tomorrow buy the new one again because we already bored with the old clothes, until we don’t realize that we spent our money very fast, and then we regret it in the end of the month), next is we will have to always update our clothes so that everyone will think that we are fashionable enough, where it’s just make us never satisfy with our appearance and that’s so for sure. That’s why continuing the use of uniform (dress codes) after we graduate from Senior High School have many positive advantages such as encourage the power of equality, saving money, prevent bullying, and help college’s image building.

When we enter the college, of course we will meet many new friends with different economy background. Some of them will come from rich family, some others are not. But, what is mostly happens is rich students will be very dominating. They will use branded clothes
Appendix 3

every day in the campus. It will cause a big gap with the students who come from middle-low family who will use unbranded clothes. Rich students will middle-low students and it can drop the mental. It’s okay if one middle-low student has strong mental to overcome the dominating from rich students, but for a middle-low student who isn’t mentally strong enough, it’ll be quite dangerous because it may causes that student to feel shy, mentally down, even stop from the college only because he/she can’t compete their clothes’ brand with the rich students’ and that mostly cause by they (middle-low student) doesn’t have enough money to buy branded clothes. That’s why, if the college has dress codes or uniform for the students, it will very helpful to reduce the gap between rich and poor students, because all of them will be forced to use the same uniform or clothes which have the same brand, price, model, and quality. At least, there will be a similarity between the students.

The other advantages of college’s dress code is it can help the student to save their money because they don’t need to buy new clothes oftenly. They may want to follow the newest trend but at least they can’t use their new clothes in the college while in foot they’ll spent their time mostly in the campus. It’s also good for students who come from a middle-low economy background because they don’t need to stress to find money in order to buy new clothes routinely only to make their selves look similar and as fashionable as the rich students.

Prevent bullying is also another positive thing from the dress codes in college because as we know that the model choices of clothes for students who are overweight are not as much as the model choices of clothes for who with a normal weight. An obese
Appendix 3

Student can’t use mini dress because it will show their big belly. They only can wear large size clothes that are not as cute as a normal-size clothes. That can makes a fat student to ge bully from a normal weight student because their clothes’ model are not as much as the others and it will reduce their fashionable rate.

The last is that dress codes in college can help the image building of the college. Here it means that a uniform can increase the nationality rate of the college. Also usually a college has their own uniq side that is applying in their uniform. For example, a go green college will make a green color uniform so that people in the outside can realize that go green image from seeing the students of the college. Some will say it can reduce student’s creativity and freedom in their own style, etc. Some tips for a college who wants to use a uniform are:

1. Make a uniform that can let students to add some accessories to help them apply their creativity and style.
2. Allow the students to combine the uniform with one or two kinds of additional clothes such as cardigan, jumper, or jacket.
3. Give one day free uniform day for the students so they can still have a chance to express their fashion style.
4. The college can make an event for the students to modify the uniform to be more interesting look. Or maybe the college can make a competition that let the students to create a new uniform model and the winner will be able to produce his/her uniform and all students will wear that new uniform. Hopefully, it can attract student’s feeling to enjoy wearing a uniform.
Let’s Install CCTV in Class

As we know in era globalization, we have many sophisticated technology. With technology we can do something easily. Now we can enjoy the technology, we can get it very easy for example the handphone, camera, CCTV, computer etc. all of the technology above is very usefull for us, Like CCTV, with this we can many places easily. We do not have spent our energy to control each corner of the places. We just need to sit infront of the monitor in one room. We can control all of the places that have been installed by CCTV. So CCTV is very helpful for us. CCTV is very useful when it is installed in classroom. If you use in class room, you can control the students easily. There are many benefits for teachers and students if they use CCTV in class room. First the teacher can monitoring the students. The students can feel more safty; the teacher can make the class save.

The teacher can control the students easily, so the teacher could know anything what the students are doing when the teacher out of the class. So with the CCTV, the teacher are able to apply discipline to students. In addition; when students are doing exam, the teacher are able to monitoring the students who are cheating in class. So CCTV is very usefull.

Second, the students can feel more safty if their school is installed by CCTV So the parents of the students do not need afraid. The parents can believe to school. As we know, many criminality occur in school. With CCTV, the teacher can know each person who come to school.
Appendix 3

Third, CCTV can make the class room safty. Not only class room actually but also the school. CCTV can monitor all of the part of school. It can avoid from robber and foreign people who come to school. If the school do not have CCTV, many people or foreign people from outside can enter the school easily. In television many of incidents that occur in students, like kidnapping, So CCTV can reduce that incident. Also CCTV can reduce sexual harrastment for students.

So the conclution is using or installing CCTV in class is very usefull not only for students and techers but also the perents of student can feel their child more safty. In class CCTV can monitor the students activity. CCTV can help the teacher to keep the students save.

From the explanation above, I will give you recommendation to install CCTV in class.

- With CCTV that installed in class you can make your students safty.
- With CCTV in class you can monitor the activities of the students
- With CCTV you can make the parent of the students sure about the school.
