Dean of Teaching Training Faculty

Dra. Magdalena I.K, MA
Head of English Department
ACKNOWLEDGEMENTS

Above all, the writer would thank to Almighty God for His grace and mercy so that she may finish her study at Widya Mandala Catholic University in due time.

Her deepest and sincere gratitude also goes to:

1. Drs. A. Ngadiman, MPd, her first thesis writing advisor, whose invaluable guidance, encouragement, and suggestions have been of great help to her in accomplishing this thesis.

2. Dra. Siti Mina Tamah, her second thesis-writing advisor, for her valuable suggestions and comments in improving this thesis.

3. The headmaster and the English teachers of St. Louis Senior High School Surabaya, who have allowed her to conduct this study at the school.

4. All the students of SMAK ST. LOUIS Sby, especially for the second year Students of Al program who had participated in the teaching reading process which was carried out for her study.

5. Drs. I. Nyoman Arcana, who has spent his valuable
time in helping her with the statistical computation for this thesis.

6. Her beloved family, for their deep understanding and continual support during her study and this thesis writing.

7. All the lecturers of Widya Mandala Catholic University for their guidance during her study at the University.

Finally, the writer wishes to thank to everyone who has given his assistance in the completion of this thesis. The writer realizes that without them, this thesis would never have been accomplished the way it should be.

ABSTRACT

According to the 1987 SMA Curriculum, the main objective of teaching English at high school is to enable students to comprehend the English reading passage well so as to prepare themselves for their further study since most references and textbooks that are used at University are usually written in English. Although the teaching of English has emphasized more on reading, the difficulty in comprehending the reading passages still occurs because they spend much time reading the reading comprehension passage, but they still lack of comprehension. This is due to the fact that they are almost never trained to read for meaning. One of ways to enable students to read for meaning, according to E. Quinn (1980), Gerald (1976), Gloria (1987), and Gordon (1977) is to train the students to read fast. To them if the students can read more quickly, they can understand more material than before. The prime purpose of Speed reading is not only save the time but also to improve comprehension.

The opinions of these experts have led the writer to investigate whether speed reading affect reading comprehension or not. One major hypothesis and four minor ones were put forth in this study. The major hypothesis is "Speed reading affects reading comprehension", where as the minor ones are (1) Speed reading improves Students' comprehension in answering factual questions, (2) Speed reading improves Students' comprehension in answering inference questions, (3) Speed reading improves Students' comprehension in answering main idea questions, (4) Speed reading improves Students' comprehension in answering structural questions.

To carry out her study, she used one class of the second year students of A1 program of SMAK St. Louis Surabaya as the subject of her study. A set of instrument was used to obtain the required data, of which format was multiple choice. It is used in pre-test and post-test. To know the effect of speed reading on reading comprehension, the data were analysed statistically using the formula of t-test.

The result of the study reveals that speed reading affect reading comprehension achievement in factual questions, inference questions, main idea questions, and structural questions. Such results were caused by the students' ability to select important facts and details. Besides during reading a passage, the students got the meaning or idea by the unity of the text not word by word.
