Dr. Agustinus Ngadiman, M.Pd
Dean of the Teacher Training Faculty

Dra. Susana Tegilulis, M.Pd
Head of the English Department
ACKNOWLEDGEMENTS

First of all, the writer would like to thank God for His blessing and grace which enables her to accomplish this thesis.

The writer also realizes that this thesis will not be accomplished without assistance and encouragement from many people. Having completed this thesis, the writer feels very much indebted and would like to send her deepest gratitude to:

1. Dr. Patrisius I Djiwandono, her first advisor, who has devoted his valuable time to guide, support, and motivate the writer in conducting her thesis.

2. Veronica Aniek Setiawaty, S.Pd, her second advisor who has given her valuable advice and guidance to the writer in finishing her thesis.

3. All the lecturers of the English Department of Widya Mandala Catholic University, who have taught the writer during her academic years so that she can finish her study at this university.

4. The writer's beloved mother and father for their prayer, love, patience, attention and their financial support which are given to her in finishing her study in this university.

5. The writer's loving best friends, Aida and Diana, who have given her moral support and suggestions during finishing the thesis.

6. The writer's cell group members (Ce Ellen, Yulily, Rico, Vonny, Cherry) for the encouragement, love and prayer in finishing this thesis.
7. All the librarians, who have helped the writer in collecting the data for her thesis.

Finally, the writer also thanks everyone whose name is all-impossible to be written in this thesis, for her or his help and encouragement to accomplish this thesis. The writer realizes that without them, this thesis would never have been accomplished the way it should be.

ABSTRACT

Advisors: Dr. Patrisius I Djiwandono and Veronica Aniek Setiawaty, S.Pd

Keywords: Internet, Chatting, Language Function, Language Style, Jargon

Communication breaks through space and time. Today, people can communicate more easily because there is a telecommunication system named Internet, which links computer around the world to provide international communication services. By using Internet, people can send message or e-mail (electronic mail), shop for products, and buy them on line, find and download software, make travel plans, do financial planning, look for a new job, read some information published on the Web, search for people, and many other interesting services. The most interesting service, which is preferred by people all over the world and in every age, is chatting.

Chatting in the Internet is now not a new phenomenon in this globalization era. It is possible to talk to people in "real time" than to wait for e-mail. By using a chatting program named IRC, which stands for Internet relay chat, people may invite interested users to join the channel and communicate among themselves by typing the messages to everyone on the channel or sending private messages to individuals.

As a means of communication, chatting also possesses typical characteristics of human communication. One of the characteristics is language style. One can speak very formally or informally, his choice being governed by circumstances. No individual speaks the same way at all times. Therefore, a person may change the style or the way he speaks according to the situation and context. In chatting, the dominant styles, which are used, are casual and intimate. These styles can be explained by a theory of language styles proposed by Martin Joos (1962). He states that in an informal setting, people tend to demonstrate these two styles. The linguistics features of these styles are:

- not complete sentences
- the use of contractions and shortened forms of words
- the use of new and sometimes not polite words and meaning
- diction: simple, mostly popular colloquial, frequent contractions, clipped words and some slang

The language used in Internet chatting is informal, because the chatters will feel more comfortable and more confident when chatting with people without necessarily meet face to face. This condition brings them on the various chatting topics they like, without feeling clumsy when they are chatting with the invisible chatting partner. Therefore, in Internet chatting people do not consider about the
grammatical rules and they use abbreviations, slang, jargons, and non-verbal symbols, like smileys to make the conversation more interesting and intimate.
